

# CM16

## Studio Condenser Microphone full starter kit

CM16 is a Cardioid Studio Condenser Microphone full starter kit.

Whatever you want to record, guaranteeing the best sound possible doesn't get easier than this. The cardioid polar pattern is focusing audio capture in front of the capsule, minimizes unwanted ambient sound from the other sides and back of the microphone.

CM16 is the perfect solution for podcasting, vlogging, gaming or studio-grade recording that fuses studio-quality sound with everything you need to start recording right out the box.
